

Research outputs

Geothermal energy potential of the Mangyshlak Basin, western Kazakhstan: A preliminary assessment based on stratigraphy and temperature data

Kozhagulova, A., Dillinger, A., Bayramov, E., Iltukov, R., Holbrook, J. & Fustic, M., Mar 2023, In: *Geothermics*. 109, 102655.

Geological controls on the geothermal system and hydrogeochemistry of the deep low-salinity Upper Cretaceous aquifers in the Zharkent (eastern Ily) Basin, south-eastern Kazakhstan

Kozhagulova, A., Yapiyev, V., Karabayanova, L., Dillinger, A., Zavaley, V., Kalitova, A., Bayramov, E., Holbrook, J., Grasby, S. E. & Fustic, M., 2023, In: *Frontiers in Earth Science*. 11, 1212064.

Remote Surveillance of Differential Deformation for Kazakhstan Offshore Kashagan Oilfield Using Microwave Satellite Remote Sensing

Bayramov, E., Tessari, G., Kada, M., Aliyeva, S. & Buchroithner, M., 2023, In: *Remote Sensing*. 15, 4754

Quantifying Two-Dimensional Surface Displacements Using High-Resolution Cosmo-SkyMed, TerraSAR-X and Medium-Resolution Sentinel-1 SAR Interferometry: Case Study for the Tengiz Oilfield

Bayramov, E., Tessari, G. & Kada, M., Sept 2022, In: *Sensors*. 22, 17, 6416.

Multi-temporal SAR Interferometry for Vertical Displacement Monitoring from Space of Tengiz Oil Reservoir using SENTINEL-1 and COSMO-SKYMED Satellite Missions

Bayramov, E., 2022, In: *Frontiers in Environmental Science*.

Quantitative assessment of vertical and horizontal deformations derived by 3d and 2d decompositions of insar line-of-sight measurements to supplement industry surveillance programs in the tengiz oilfield (Kazakhstan)

Bayramov, E., Buchroithner, M., Kada, M. & Zhuniskenov, Y., Jul 1 2021, In: *Remote Sensing*. 13, 13, 2579.

A preliminary assessment of Geothermal Energy Potential of Mangyshlak sedimentary basin in Kazakhstan

Kozhagulova, A., Iltukov, R., Tileugabylov, A., Yegeubayeva, A., Bayramov, E. & Fustic, M., 2021, *2nd Geoscience and Engineering in Energy Transition Conference, GET 2021*. European Association of Geoscientists and Engineers, EAGE, (2nd Geoscience and Engineering in Energy Transition Conference, GET 2021).

Assessment of Vertical and Horizontal Deformations Derived by 3D and 2D Decompositions of InSAR Line-of-Sight Measurements to Supplement Industry Surveillance Programs in the Tengiz Oilfield (Kazakhstan)

Bayramov, E., 2021, In: *Remote Sensing*.

Quantitative assessment of ground deformation risks, controlling factors and movement trends for onshore petroleum and gas industry using satellite Radar remote sensing and spatial statistics

Bayramov, E., 2020, In: *Georisk*.

Quantitative assessment of ground deformations for the risk management of petroleum and gas pipelines using radar interferometry

Bayramov, E., Buchroithner, M. & Kada, M., 2020, In: *Geomatics, Natural Hazards and Risk*. 11, 1, p. 2540-2568 29 p.

Quantitative Assessment of Ground Deformations for the Risk Management of Petroleum and Gas Pipelines Using Radar Interferometry. Geomatics, Natural Hazards and Risk

Bayramov, E., 2020, In: *Geomatics, Natural Hazards and Risk*.

Radar Remote Sensing to Supplement Pipeline Surveillance Programs through Measurements of Surface Deformations and Identification of Geohazard Risks

Bayramov, E., 2020, In: *Remote Sensing*.

Application of the MODIS MOD 17 Net Primary Production product in grassland carrying capacity assessment

de Leeuw J., Rizayeva A., Namazov E., Bayramov E., Marshall M. T., Etzold J., Neudert R. , 2019, In: *International Journal of Applied Earth Observation and Geoinformation*.

Quantitative assessment of climate change impacts onto predicted erosion risks and their spatial distribution within the landcover classes of the Southern Caucasus using GIS and remote sensing

Bayramov, E., Schlager, P., Kada, M., Buchroithner, M. & Bayramov, R., 2019, In: Modeling Earth Systems and Environment.

Quantitative prediction and mitigation of landslides and erosion risks using GIS and remote sensing

Bayramov, E., 2019, *Quantitative prediction and mitigation of landslides and erosion risks using GIS and remote sensing*. Eurasian RISK 2019 Conference

Space Unmanned Air Systems Support the Optimization of Exploration and Reservoir Development Activities in AGT Region

Bayramov, E., 2019, *Space Unmanned Air Systems Support the Optimization of Exploration and Reservoir Development Activities in AGT Region*. Society of Petroleum Engineers (SPE)

Enhanced use of GIS and Remote Sensing for the restoration monitoring of construction footprints and prediction of soil erosion risks along petroleum and gas pipelines

Bayramov, E., 2018, *Enhanced use of GIS and Remote Sensing for the restoration monitoring of construction footprints and prediction of soil erosion risks along petroleum and gas pipelines*. Eurasian GIS Congress 2018

Modelling of Oil Spills and Coastal Pollution Probability and Validation using Multi-Temporal Remote Sensing Data

Bayramov, E., 2018, *Modelling of Oil Spills and Coastal Pollution Probability and Validation using Multi-Temporal Remote Sensing Data*. International Conference "Understanding the Problems of Inland Waters: Case Study for the Caspian Basin"

Monitoring oil spill hotspots, contamination probability modelling and assessment of coastal impacts in the Caspian Sea using SENTINEL-1, LANDSAT-8, RADARSAT, ENVISAT and ERS satellite sensors

Bayramov, E., Kada, M. & Buchroithner, M., 2018, In: Journal of Operational Oceanography. 11:1, 27-43

Role of Satellite Observation and Geospatial Technologies for the Maintenance and Mitigation of Risks to Critical Energy Infrastructure of the Caspian Sea

Bayramov, E., 2018, *Role of Satellite Observation and Geospatial Technologies for the Maintenance and Mitigation of Risks to Critical Energy Infrastructure of the Caspian Sea*. IFAC Secretariat

Satellite Observations of Oil Spill and Approximation of Leak Sources from Old Petroleum and Gas Infrastructure in the Caspian Sea

Bayramov, E., 2018, *Satellite Observations of Oil Spill and Approximation of Leak Sources from Old Petroleum and Gas Infrastructure in the Caspian Sea*. International Conference "Understanding the Problems of Inland Waters: Case Study for the Caspian Basin"

Using multiple satellite observations to quantitatively assess and model oil pollution and predict risks and consequences to shoreline from oil platforms in the Caspian Sea

Bayramov, E., Knee, K., Kada, M. & Buchroithner, M., 2018, In: Human and Ecological Risk Assessment. 24:6, 1501-1514

Remote Sensing Technologies in the Environmental Monitoring and Management of Water Resources Pollution of the Caspian Sea from Petroleum and Gas Industry

Bayramov, E., 2017, *Remote Sensing Technologies in the Environmental Monitoring and Management of Water Resources Pollution of the Caspian Sea from Petroleum and Gas Industry*. 2017 NCR Water Resources Symposium

Multi-temporal assessment of ground cover restoration and soil erosion risks along petroleum & gas pipelines in Azerbaijan using GIS and Remote Sensing

Bayramov, E., Buchroithner, M. & Bayramov, R., 2016, In: Environmental Earth Sciences. 75:256

Quantitative assessment of 2014–2015 land-cover changes in Azerbaijan using object-based classification of LANDSAT-8 timeseries

Bayramov, E., Buchroithner, M. & Bayramov, R., 2016, In: Modeling Earth Systems and Environment. 2:35

Role of radar and optical earth observation data in the disaster management and risk reduction of oil spill incidents from petroleum and gas industry in the Caspian Sea Region

Bayramov, E., 2016, *Role of radar and optical earth observation data in the disaster management and risk reduction of oil spill incidents from petroleum and gas industry in the Caspian Sea Region*. United Nations/India Workshop on the Use of Earth Observation Data in Disaster Management and Risk Reduction: Sharing the Asian Experience

Detection of oil pollution hotspots and leak sources through the quantitative assessment of the persistence and temporal repetition of regular oil spills in the Caspian Sea using remote sensing and GIS

Bayramov, E., 2015, *Detection of oil pollution hotspots and leak sources through the quantitative assessment of the persistence and temporal repetition of regular oil spills in the Caspian Sea using remote sensing and GIS*. ISPRS Annals of the Photogrammetry, Remote Sensing and Spatial Information Sciences

Modelling of oil spill frequency, leak sources and contamination probability in the Caspian Sea using multi-temporal SAR images 2006–2010 and stochastic modelling

Bayramov, E. & Buchroithner, M., 2015, In: *Geomatics, Natural Hazards and Risk*. 7:3, 1175-1197

Detection of oil spill frequency and leak sources around the Oil Rocks Settlement, Chilov and Pirallahi Islands in the Caspian Sea using multi-temporal ENVISAT radar satellite images

Bayramov, E. & Buchroithner, M., 2014, In: *Environmental Earth Sciences*. (73)7: 3611-3621

GIS and Remote Sensing based quantitative assessment of oil spill frequencies, leak sources and their controlling natural factors around oil rocks over islands in the Caspian Sea using multi temporal ENVISAT radar satellite images 2009 – 2010

Bayramov, E., 2014, *GIS and Remote Sensing based quantitative assessment of oil spill frequencies, leak sources and their controlling natural factors around oil rocks over islands in the Caspian Sea using multi temporal ENVISAT radar satellite images 2009 – 2010*. Geological Remote Sensing Group (GRSG) Silver Anniversary Conference 2014, 25 Years of Geological Remote Sensing

Multi-temporal assessment of oil spill frequencies, leak sources and their controlling natural factors and validation of achieved results through the stochastic modeling of oil spills in the Caspian Sea using GIS and remote sensing

Bayramov, E., 2014, *Multi-temporal assessment of oil spill frequencies, leak sources and their controlling natural factors and validation of achieved results through the stochastic modeling of oil spills in the Caspian Sea using GIS and remote sensing*. Earth Observation for Ocean-Atmosphere Interactions Science 2014

Quantitative Assessment of the Restoration Progress in the Shirvan National Park using Multi-Temporal Remote Sensing and GIS Analysis

Bayramov, E., 2014, *Quantitative Assessment of the Restoration Progress in the Shirvan National Park using Multi-Temporal Remote Sensing and GIS Analysis*. Remote Sensing and GIS for Monitoring of Habitat Quality

Quantitative Prediction of Soil Erosion Risks along Oil and Gas Pipelines using USLE and MMF Models

Bayramov, E., 2014, *Quantitative Prediction of Soil Erosion Risks along Oil and Gas Pipelines using USLE and MMF Models*. RIMMA 2014 (RISK Information Management, Risk Models and Applications)

Differences of MMF and USLE Models for Soil Loss Prediction along BTC and SCP Pipelines

Bayramov, E., Buchroithner, M. & McGurty, E., 2013, In: *Journal of Pipeline Systems Engineering and Practice*. 4(1), 81–96

GIS and Remote Sensing based Environmental Management for the Sustainable Development of the Shirvan National Park in Azerbaijan

Bayramov, E., 2013, *GIS and Remote Sensing based Environmental Management for the Sustainable Development of the Shirvan National Park in Azerbaijan*. United Nations/Belarus Workshop on Space Technology Applications for Socio-Economic Benefits

GIS and Remote-Sensing-Based Environmental Management of the Shirvan National Park in Azerbaijan

Bayramov, E., 2013, *GIS and Remote-Sensing-Based Environmental Management of the Shirvan National Park in Azerbaijan*. Environmental Systems Research Institute (ESRI)

Quantitative evaluation of environmental status of the Shirvan National Park using multitemporal Remote Sensing and GIS analysis

Bayramov, E., 2013, *Quantitative evaluation of environmental status of the Shirvan National Park using multitemporal Remote Sensing and GIS analysis*. 6th International Conference on Earth from Space - the Most Effective Solutions

Climate factors controlling NDVI along Right-of-Way of petroleum/gas pipelines for planning of revegetation

Bayramov, E., 2012, *Climate factors controlling NDVI along Right-of-Way of petroleum/gas pipelines for planning of revegetation*. GISRUK

Determination of main climate and ground factors controlling vegetation cover regrowth along oil and gas pipelines using multiple, spatial and geographically weighted regression procedures

Bayramov, E., Buchroithner, M. & McGurty, E., 2012, In: *Environmental Earth Sciences*. 66:2047–2062

Evaluation of Revegetation Progress and Erosion-Prone Areas along Oil and Gas Pipelines in Azerbaijan

Bayramov, E., 2012, *Evaluation of Revegetation Progress and Erosion-Prone Areas along Oil and Gas Pipelines in Azerbaijan*. Oil and Gas European Magazine

Prediction reliability, quantitative differences and spatial variations of erosion models for long-range petroleum and gas infrastructure

Bayramov, E., 2012, In: *Georisk*. 6 (4): 252-272

Qualitative Multi-Criteria and Quantitative Soil Erosion Prediction Methods Along BTC and SCP Pipelines

Bayramov, E., 2012, *Qualitative Multi-Criteria and Quantitative Soil Erosion Prediction Methods Along BTC and SCP Pipelines*. GI Zeitgeist 2012

Quantitative assessment of vegetation cover and soil degradation factors within terrain units for planning, monitoring and assessment of renaturation along oil and gas pipelines

Bayramov, E., Buchroithner, M. & McGurty, E., 2012, In: *Geocarto International*. 27 (7):535-555

Role of GIS and Remote Sensing in the Environmental Management of Petroleum/Gas Pipelines

Bayramov, E., 2012, *Role of GIS and Remote Sensing in the Environmental Management of Petroleum/Gas Pipelines*. Environmental Systems Research Institute (ESRI)

GIS based Landscape and Environmental Planning Instrument for the Azerbaijan Caspian Sea Coastal Nature Protected Areas

Bayramov, E., 2008, *GIS based Landscape and Environmental Planning Instrument for the Azerbaijan Caspian Sea Coastal Nature Protected Areas*. Environmental Systems Research Institute (ESRI)

Up-to-date GIS based method as the important component of Landscape Planning to predict Caspian water level fluctuation impacts on the located along Caspian Sea Coastal Line Natural Protected Areas

Bayramov, E., 2007, *Up-to-date GIS based method as the important component of Landscape Planning to predict Caspian water level fluctuation impacts on the located along Caspian Sea Coastal Line Natural Protected Areas*. Proceedings of Recent Advances in Space Technologies
